ABSTRACT

This study is based on the material of the genus *Tachysphex* Kohl, 1883 (Crabronidae: Hymenoptera) collected from different localities of Tunisia between 2017 and 2019. In this study, a total of 38 species and subspecies are recorded. Among them, *Tachysphex mauretanus* Puławski, 1971 and *T. sericans gracilis* Puławski, 1971 are new records for Tunisian fauna. New provincial records are cited for the majority of newly collected species. Digital photographs for general view of newly collected species are provided. Distribution in Tunisia and in the world of identified taxa is given.

Keys words: Hymenoptera, Crabronidae, *Tachysphex*, checklist, new records, Tunisia.

INTRODUCTION

The genus *Tachysphex* Kohl, 1883 belongs to the family Crabronidae and to the tribe Larrini Latreille, 1810. The world fauna of this genus is presented by 453 species; thus, presenting approximately 34% and 9.36% of species of the tribe Larrini and of the subfamily Crabroninae respectively (Puławski, 2020). *Tachysphex* species are found all over the world. They are terricolous, digging their nests in the ground and the female supply its nests generally by prey of orthopteroids species (Bohart & Menke, 1976). Prey of Palearctic *Tachysphex* are members of the families Acrididae, Tettigoniidae and Mantidae and genera of *Oecanthus* Audinet-Serville, 1831 and *Ectobius* Stephens, 1835 (Puławski, 1971).

Systematic studies of the genus started with Kohl (1885) who studied Palearctic fauna by describing 23 species. Additional studies over the genus appeared later in time, especially that of de Beaumont (1936) who revised this genus in France by dividing it into groups of species to facilitate its study. The same author (1940, 1947a) studied in details the Egyptian fauna and his studies are considered as the first and the only one treating properly the fauna of a single Northern African country. However, Puławski in his review of the genus in Eastern and Western Palearctic region (1971) and in Africa and Arabia (2007) described new species from North Africa and cited several new records from North African countries. In this sense and with the exception of some records included in older labours such as those of Graeffe (1906) and of von Schulthess (1926) and in the recent studies Puławski (1971, 2007), the Tunisian fauna of *Tachysphex* looks like to be still poorly investigated and a focused over this area study lacks at present. This paper aims to establish a complete list of *Tachysphex* species in Tunisia as well as to contribute to the knowledge of this fauna in the country with original data.

MATERIAL AND METHODS

The checklist is established on records mentioned in different sources of literature and on materials newly collected using entomological nets in Tunisia during spring and summer between 2017 and 2019. Collecting localities with their geographical coordinates are presented in Table 1. For each taxon, current name species, distribution in Tunisia and in the world is presented. Species and subspecies valid names are followed by a reference to the original description, including the name under which it was originally described and the year and page of description. ‘Tunisia (no specific locality)’ is cited if the province is not mentioned.

Newly collected specimens were identified firstly by the first author using keys proposed in the literature mainly Puławski (1971, 2007) and then confirmed or re-identified by Dr. Jakub Straka (Charles University, Faculty of Science, Department of Zoology, Czech Republic) and Dr. Toshko Ljubomirov (Institute of Biodiversity and Ecosystem Research, Bulgarian Academy of Sciences Bulgaria). Identified materials are deposited a part in the Collection Ben Khedher at the Laboratory of Entomology and Insect Ecology in Regional Research Centre for Horticulture and

First Checklist of Tachysphex Kohl, 1883 of Tunisia

Organic Agriculture (CRRHAB) in Chott Meriem, Sousse, Tunisia and a part in Atatürk University Biodiversity Science Museum (ABBM), Erzurum, Turkey.

Distribution in Tunisia: Kairouan (von Schulthess, 1926).

General distribution: Albania, Austria, Azerbaijan, Bulgaria, Croatia, France, Greece, Hungary, Iran, Italy, Portugal, Romania, Spain, Russia, Switzerland, Tunisia, Turkey, Ukraine, Yugoslavia (Puławski, 2020).

Remark: This species was identified from Tunisia by von Schulthess (1926) as the synonym *Tachysphex rufipes* (von Aichinger, 1870).

***Tachysphex consocius* Kohl, 1892 (Fig. 1D)**

Tachysphex consocius Kohl, 1892: Annalen des kaiserlich-königlichen naturhistorischen Hofmuseums. Wien, 7: 217.

Material examined. Le Kef: Western Le Kef, Semmena, 555 m, 25.4.2018, 1 ♂; Kebili: South Kebili, Errahmat, 30 m, 17.5.2018, 1 ♀, 18.5.2018, 1 ♂.

Distribution in Tunisia: Tozeur (Puławski, 1971, 2007).

General distribution: Africa, Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates), Southern Europe to Central Asia, India, Sri Lanka (Gadallah, 2020).

First Checklist of Tachysphex Kohl, 1883 of Tunisia

***Tachysphex costae* (De Stefani Perez, 1882)**

Tachysphex costae De Stefani Perez, 1882: II Naturalista Siciliano, 1: 42.

Distribution in Tunisia: Nabeul (Puławski, 2007).

General distribution: Mediterranean basin, north to southern France, Romania and Hungary, East to Kazakhstan, Transcaspian region, Western Pakistan, China, South to South Africa, Arabian Peninsula (Oman, United Arab Emirates, Yemen) (Gadallah, 2020).

***Tachysphex denisi* de Beaumont, 1936 (Fig. 1E)**

Tachysphex denisi de Beaumont, 1936: Annales de la Société Entomologique de France, 105: 197.

Material examined. Siliana: Kisra, 809 m, 27.4.2018, 2 ♀♀.

Distribution in Tunisia: Nabeul (Puławski, 1971).

General distribution: Algeria, Canary Islands, Egypt, France, Libya, Morocco, Portugal, Spain (Puławski, 2020).

***Tachysphex detritus* Arnold, 1924**

Tachysphex schönlandi var. *detritus* Arnold, 1924: Annals of the Transvaal Museum, 11: 69.

Distribution in Tunisia: Medenine (Puławski, 1971, 2007).

General distribution: Arabian Peninsula (Bahrain, United Arab Emirates), South Africa to North Africa, Israel, Tajikistan, Turkmenistan (Gadallah, 2020).

Remark: This species was identified by Puławski (1971) from Tunisia as the synonym *Tachysphex maidli* de Beaumont, 1940.

***Tachysphex erythropus* (Spinola, 1839) (Fig. 1F)**

Lyrops erythropus Spinola, 1839. Annales de la Société Entomologique de France, 7: 479.

Material examined. Kasserine: Sbeitla, Athar, CFPA, 560 m, 03.9.2018, 1 ♂; Kebili: Janouara, Rass Elain, 56 m, 16.5.2018, 1 ♀; Mahdia: Eljem, Athamnia, 70 m, 22.7.2019, 1 ♂, Ksour Essef, Alya, 1 m, 03.8.2018, 3 ♂♂, Salakta, 1 m, 03.8.2018, 1 ♂, Rejich, 3 m, 18.9.2018, 1 ♂, Sidi Alouane, Lemsanaa, 41 m, 01.6.2018, 1 ♂, Saada, 74 m, 18.6.2019, 2 ♂♂; Nabeul: Mida, Libna, 20 m, 05.9.2017, 1 ♂; Sidi Bouzid: Rgueb, Aouled Ayouni, 142 m, 18.7.2017, 1 ♂, West Sidi Bouzid, Zaafria, 394 m, 25.7.2018, 3 ♂♂.

Distribution in Tunisia: Kairouan (von Schulthess, 1926); Jendouba, Kebili (Puławski, 2007).

General distribution: Africa, Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates), Southern Europe to Central Asia, India, China (Gadallah, 2020).

Remark: This species was identified by von Schulthess (1926) from Tunisia as the synonym *Tachysphex heliopolites* Morice, 1897.

***Tachysphex fugax* (Radoszkowski, 1877)**

Tachytes fugax Radoszkowski, 1877. Izvestiya Imperatorskogo Obshchestva Lyubiteley Estestvoznaniiya, Antropologii i Étnografii pri Imperatorskom Moskovskom Universitete, 26: 30.

Distribution in Tunisia: Bizerte, Kasserine, Kebili, Sfax, Tozeur (Puławski, 2007).

General distribution: Africa, Southern Europe, Middle East and southern Caucasus, Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan (Puławski, 2007).

***Tachysphex fulvitarsis* (A. Costa, 1867)**

Tachytes fulvitarsis A. Costa, 1867. Annuario del Museo Zoologico della R. Università di Napoli, 4: 86.

Distribution in Tunisia: Jendouba (Puławski, 2007).

General distribution: Africa, Azerbaijan, Europe, Kazakhstan, Middle East, Pakistan, Russia, Transcaspia (Puławski, 2020).

***Tachysphex gracilicornis* Mercet, 1909 (Fig. 1G)**

Tachysphex gracilicornis Mercet, 1909. Boletín de la Real Sociedad Española de Historia Natural, 9: 194.

Material examined. Beja: Slouguia, 60 m, 17.8.2018, 1 ♀; Kairouan: Chbika, Aouled Zair, 136 m, 29.8.2018, 2 ♀♀, South Kairouan, Ragada, 92 m, 28.8.2018, 1 ♂; Kasserine: Sbeitla, Athar, Oued Nakhil, 562 m, 04.9.2018, 1 ♂, 1 ♀, Route Fej Ettin, 545 m, 05.9.2018, 1 ♀; Mahdia: Eljem, Tlelsa, 70 m, 13.8.2019, 1 ♂, 1 ♀, Ksour Essef, Alya, 1 m, 03.8.2018, 2 ♀♀, Sidi Alouane, Sidi Alouane 2, 69 m, 09.8.2018, 1 ♂, 2 ♀♀, Zelba, 49 m, 11.8.2018, 1 ♂; Sidi Bouzid: East Sidi Bouzid, Elhachria, 326 m, 24.7.2018, 3 ♀♀; Tozeur: Hamma Ejrid, 52 m, 27.6.2018, 1 ♀.

Distribution in Tunisia: Gafsa (von Schulthess, 1926); Kairouan (Puławski, 1971); Bizerte, Gabes, Jendouba, Kairouan, Medenine, Tataouine, Tozeur, Zaghouan (Puławski, 2007).

General distribution: Morocco to Mediterranean coast of Egypt and Sinai, south to Mauritania (Puławski, 2007).

Remark: This species was identified by von Schulthess (1926) from Tunisia as the synonym *Tachysphex eduardi* Morice in E. Saunders, 1910.

***Tachysphex gracilitarsis* Morice, 1910**

Tachysphex gracilitarsis Morice in E. Saunders, 1910. The Transactions of the Entomological Society of London, 1910: 527.

Distribution in Tunisia: Kairouan, Sfax (von Schulthess, 1926).

General distribution: Algeria, Libya, Morocco, Spain, Tunisia (Puławski, 2020).

***Tachysphex graecus* Kohl, 1883**

Tachysphex graeca Kohl, 1883. Deutsche Entomologische Zeitschrift, 27: 174.

Distribution in Tunisia: Kairouan (von Schulthess, 1926).

Material examined. Tozeur: Nefta, Nefta oasis, 56 m, 28.6.2018, 1 ♂.

Distribution in Tunisia: Kebili (Puławski, 2007).

General distribution: Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates, Yemen), North Africa south to Mali, Nigeria and Sudan, India, Israel, Sri Lanka, Tajikistan, Turkmenistan (Gadallah, 2020), Iran (Fallahzadeh et al, 2018).

Tachysphex horus de Beaumont, 1940

Tachysphex horus de Beaumont, 1940. Bulletin de la Société Fouad I^{er} d'Entomologie, 24: 168.

Distribution in Tunisia: Tataouine (Puławski, 2007).

General distribution: Arabian Peninsula (Oman, Yemen, Saudi Arabia), Burkina Faso, Egypt, Israel, Tunisia (Gadallah, 2020).

Tachysphex incertus (Radoszkowski, 1877) (Fig. 1I)

Tachytes incerta Radoszkowski, 1877. Izvestiya Imperatorskogo Obshchestva Lyubiteley Estestvoznanija, Antropologii i Etnografii pri Imperatorskom Moskovskom Universitete, 26: 28.

Material examined. Beja: Mjez Elbeb, South Mjez Elbeb, 53 m, 17.8.2018, 1 ♂, Testour, Chambou, 81 m, 16.8.2018, 1 ♂.

Distribution in Tunisia: Sfax, Tozeur (von Schulthess, 1926); Ben Arous (de Beaumont, 1947b); Jendouba, Tozeur (Puławski, 2007).

General distribution: Arabian Peninsula (Oman, United Arab Emirates, Saudi Arabia), Europe north to southern France, northern Italy, Hungary, Slovakia, Ukraine, Russia, Africa south to southern Egypt to Mali, Asia north to Turkey, Kazakhstan, east to Pakistan (Gadallah, 2020).

Remark: This species was identified by von Schulthess (1926) and de Beaumont (1947b) from Tunisia as the synonym *Tachysphex pygidialis* Kohl, 1883.

***Tachysphex julliani* Kohl, 1883 (Fig. 2A)**

Tachysphex julliani Kohl, 1883. Deutsche Entomologische Zeitschrift, 27: 177.

Material examined. Tozeur: Temeghza, Cascade 2, 247 m, 27.6.2018, 1 ♂.

Distribution in Tunisia: Jendouba, Monastir, Sfax, Tozeur (Puławski, 2007).

General distribution: Algeria, Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates, Yemen), Bulgaria, Cyprus, Egypt, France, Greece, Iran, Israel, Italy, Kazakhstan, Lebanon, Libya, Morocco, Pakistan, Portugal, Spain, Tajikistan, Tunisia, Turkey, Turkmenistan, Ukraine, Uzbekistan (Gadallah, 2020).

***Tachysphex mauretanus* Puławski, 1971 (Fig. 2B)**

Tachysphex mauretanus Puławski, 1971. Państwowe Wydawnictwo Naukowe, Wrocław: 366.

Material examined. Mahdia: Sidi Alouane, Lemsanaa, 41 m, 26.5.2018, 1 ♀.

General distribution: Algeria, Morocco (Puławski, 2007).

Remark: This species is new for Tunisian fauna.

***Tachysphex mediterraneus* Kohl, 1883**

Tachysphex mediterranea Kohl, 1883. Deutsche Entomologische Zeitschrift, 27: 173.

Distribution in Tunisia: Jendouba (Puławski, 2007).

General distribution: Europe north to southern France, Hungary and Rostov area in Russia, Africa south to northern South Africa, Israel, Turkey, India, Iran, Azerbaijan, Kazakhstan, Sri Lanka, Tajikistan, Turkmenistan, Uzbekistan (Puławski, 2007).

***Tachysphex mocsaryi* Kohl, 1884**

Tachysphex mocsaryi Kohl, 1884. Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien, 33: 367.

Distribution in Tunisia: Tunisia (no specific locality) (de Beaumont, 1947b).

General distribution: West Africa, Mediterranean area to southern Central Asia (Gadallah, 2020).

Remark: This species was cited by de Beaumont (1947b) from Tunisia as the synonym *Tachysphex mocsaryi maroccanus* de Beaumont, 1947.

***Tachysphex mycerinus* de Beaumont, 1940 (Figs. 2C-D)**

Tachysphex mycerinus de Beaumont, 1940. Bulletin de la Société Fouad I^{er} d'Entomologie, 24: 166.

Material examined. Kairouan: Chbika, Aouled Zair, 136 m, 29.8.2018, 1 ♀, South Kairouan, Ragada, 92 m, 28.8.2018, 1 ♂.

Distribution in Tunisia: Tozeur (de Beaumont, 1947a); Tataouine (Puławski, 2007).

General distribution: Morocco, to Egypt, south to Mali and Niger, Israel, Jordan (Puławski, 2007), Arabian Peninsula (Saudi Arabia, United Arab Emirates) (Gadallah, 2020)

First Checklist of *Tachysphex* Kohl, 1883 of Tunisia

***Tachysphex nitidior* de Beaumont, 1940**

Tachysphex nitidior de Beaumont, 1940. Bulletin de la Société Fouad I^{er} d'Entomologie, 24: 175.

Distribution in Tunisia: Bizerte, Gabes, Jendouba (Puławski, 2007).

General distribution: Mediterranean area to Central Asia and Mongolia, India, Korea, Senegal, United Arab Emirates (Gadallah, 2020).

***Tachysphex nitidus* (Spinola, 1805)**

Astata nitida Spinola, 1805. Faunnæ [sic] Ligusticæ fragmenta. Decas prima. Genuae, Typis Petri Cajetani Api: 17.

Distribution in Tunisia: Gafsa, Kairouan, Kasserine, Sfax, Tunis (von Schulthess, 1926); Nabeul, Tunis (Puławski, 1971); Gabes, Medenine, Tataouine, Tozeur (Puławski, 2007).

General distribution: Arabian Peninsula (Kuwait, Oman, United Arab Emirates, Saudi Arabia), Canary Islands, Europe, Israel, Kazakhstan, North Africa, Syria, Turkmenistan, Uzbekistan (Gadallah, 2020).

***Tachysphex notogoniaeformis* Nadig, 1933**

Tachysphex notogoniaeformis Nadig, 1933. Jahresbericht der Naturforschenden Gesellschaft Graubündens, 71: 80.

Distribution in Tunisia: Gafsa (de Beaumont, 1947b)

General distribution: Morocco to Libya (Puławski, 2007).

***Tachysphex palopterus* (Dahlbom, 1845) (Fig. 2E)**

Tachytes palopterus Dahlbom, 1845. Hymenoptera Europaæ praecipue borealia; formis typicis nonnullis Specierum Generum Exoticorum aut Extraneorum propter nexum systematicus associatis; per Familias, Genera, Species et Varietates disposita atque descripta. Tomus: Spheciæ in sensu Linneano. Fascicle 3: 470.

Material examined. Kasserine: Sbeitla, Athar, CFPA, 560 m, 03.9.2018, 1 ♀; Kebili: South Kebili, Errahmat, 30 m, 17.5.2018, 1 ♀; Mahdia: Rejich, 3 m, 18.9.2018, 1 ♀; Sidi Bouzid: Aouled Hafouz center, 207 m, 26.7.2018, 1 ♀; Tozeur: Hamma Ejrid, 52 m, 27.6.2018, 3 ♂♂.

Distribution in Tunisia: Tunisia (no specific locality) (de Beaumont, 1940, 1947a).

General distribution: Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates, Yemen), North Africa, to Gambia, Israel, Niger, Sudan (Gadallah, 2020).

***Tachysphex panzeri* (Vander Linden, 1829) (Figs 2F-G)**

Tachytes panzeri Vander Linden, 1829. Nouvelles Mémoires de l'Académie Royale des Sciences et Belles Lettres de Bruxelles, 5: 22.

Material examined. Beja: Mjez Elbeb, South Mjez ElBeb, 53 m, 17.8.2018, 3 ♂♂, Slouguia, 60 m, 17.8.2018, 2 ♂♂, Testour, Chambou, 81 m, 16.8.2018, 2 ♂♂, 3 ♀♀, Elghanima, 84 m, 16.8.2018, 1 ♂; Kairouan: Chbika, Aouled Zair, 136 m, 29.8.2018, 1 ♂, 3 ♀♀; South Kairouan, Barouta, 95 m, 27.8.2018, 1 ♀, Ragada, 92 m, 28.8.2018, 1 ♂, 3 ♀♀; Kasserine: Sbeitla, Athar, CFPA, 560 m, 03.9.2018, 2 ♂♂, 1 ♀, Route Fej Ettin, 545 m, 05.9.2018, 4 ♂♂, 5 ♀♀, Oued Nakhil, 562 m, 04.9.2018, 1 ♀; Kebili: South Kebili, Errahmat, 30 m, 17.5.2018, 1 ♀, 18.5.2018, 1 ♂; Mahdia: Eljem, Ababsa, 70 m, 14.8.2019, 4 ♂♂, 2 ♀♀, Achaba, 101 m, 02.7.2019, 4 ♂♂, Aouled Lahmar, 99 m, 18.6.2019, 1 ♂, 27.8.2019, 5 ♂♂, 2 ♀♀, Athamnia, 70 m, 22.7.2019, 5 ♀♀, 28.8.2019, 5 ♂♂, 2 ♀♀, Tlelsa, 70 m, 13.8.2019, 4 ♂♂, 6 ♀♀, Touahria, 74 m, 22.7.2019, 3 ♂♂, 4 ♀♀, 26.8.2019, 11 ♂♂, 1 ♀, Zghabna, 74 m, 12.8.2019, 5 ♂♂, 5 ♀♀, Zouazi, 74 m, 16.6.2019, 5 ♂♂, 5 ♀♀, Ksour Essef, Alya, 1 m, 03.8.2018, 1 ♂, Route Ksour Essef - Sidi Alouane, 33 m, 01.7.2019, 4 ♂♂, 3 ♀♀, Rejich, 3 m, 18.9.2018, 10 ♂♂, 7 ♀♀, Sidi Alouane, Ghelalba, 48 m, 19.6.2019, 2 ♂♂, 2 ♀♀, 09.9.2019, 2 ♂♂, Rmadhnia, 74 m, 03.9.2019, 4 ♂♂, 2 ♀♀, West Oued Beja, Ecole primaire Amel, 74 m, 22.6.2019, 6 ♂♂, 5 ♀♀, 10.9.2019, 3 ♂♂, 1 ♀, Saada, 74 m, 18.6.2019, 7 ♂♂, 3 ♀♀, 04.9.2019, 2 ♂♂, Saguiet Khadem, 53 m, 29.6.2019, 4 ♂♂, 2 ♀♀, 24.7.2019, 7 ♂♂, 1 ♀, 02.9.2019, 1 ♂, 1 ♀, Sidi Alouane 2, 69 m, 09.8.2018, 2 ♂♂, Oued Beja, 75 m, 21.5.2017, 1 ♂, 1 ♀, Zelba, 49 m, 11.8.2018, 1 ♂, 17.6.2019, 8 ♂♂, 4 ♀♀, 03.7.2019, 5 ♂♂, 2 ♀♀, 23.7.2019, 11 ♂♂, 4 ♀♀; Sidi Bouzid: West Sidi Bouzid, Zaafria, 394 m, 25.7.2018, 1 ♂, East Sidi Bouzid, Elhachria, 326 m, 24.7.2018, 1 ♀; Siliana: Kisra, 809 m, 27.4.2018, 2 ♀♀; Sousse: Bouficha, Salloum, 5 m, 11.9.2017, 1 ♀, Kalaa Kbira, Belaoum, 45 m, 29.7.2017, 1 ♂, 1 ♀; Tataouine: North Tataouine, Oued Tlelet, 170 m, 12.5.2018, 1 ♀; Tozeur: Dguech, Elmanachi, 63 m, 29.6.2018, 2 ♂♂, Hamma Ejrid, 52 m, 27.6.2018, 3 ♀♀, Nefta, Nefta oasis, 56 m, 28.6.2018, 1 ♀, Temeghza, Cascade 2, 247 m, 27.6.2018, 2 ♀♀.

Distribution in Tunisia: Tunis (Graeffe, 1906); Kairouan, Monastir, Tozeur, Tunis (von Schulthess, 1926); Tozeur (Puławski, 1971); Gabes, Gafsa, Jendouba, Kasserine, Kebili, Medenine, Monastir, Nabeul, Sfax, Sousse, Tozeur (Puławski, 2007).

General distribution: Albania, Algeria, Armenia, Austria, Belgium, Botswana, Bulgaria, Burkina Faso, Canary Island, Chad, China, Croatia, Cyprus, Czech Republic, Egypt, Ethiopia, France, Gambia, Germany, Greece, Hungary, India, Iran,

First Checklist of Tachysphex Kohl, 1883 of Tunisia

Israel, Italy, Kazakhstan, Latvia, Libya, Lithuania, Mali, Malta, Mauritania, Mongolia, Morocco, Netherlands, Niger, Pakistan, Poland, Portugal, Romania, Russia, Senegal, Slovakia, Spain, Sri Lanka, Sudan, Tajikistan, Tunisia, Turkey, Turkmenistan, Ukraine, Uzbekistan, former Yugoslavia, Arabian Peninsula (Bahrain, Oman, Qatar, Saudi Arabia, United Arab Emirates, Yemen) (Gadallah, 2020).

Remark: This species was identified by von Schulthess (1926) and Puławski (1971) from Tunisia as the synonym *Tachysphex panzeri oraniensis* (Lepeletier de Saint-Fargeau, 1845).

***Tachysphex psammobius* (Kohl, 1880)**

Tachytes psammobius Kohl, 1880. Zeitschrift des Ferdinandums für Tirol und Vorarlberg, 3: 235.

Distribution in Tunisia: Tunis (von Schulthess, 1926).

General distribution: Azerbaijan, Canada, Europe, Iran, Kazakhstan, Russia, Syria, Tajikistan, Turkey, Turkmenistan, Uzbekistan (Puławski, 2020).

***Tachysphex pseudofasciatus* Puławski, 2007**

Tachysphex pseudofasciatus Puławski, 2007. Proceedings of the California Academy of Sciences (Fourth Series) 58, Supplement 1: 506.

Distribution in Tunisia: Tozeur (Puławski, 2007).

General distribution: Algeria, Egypt, Israel, Tunisia (Puławski, 2007).

***Tachysphex schmiedeknechti* Kohl, 1883**

Tachysphex schmiedeknechti Kohl, 1883. Deutsche Entomologische Zeitschrift, 27: 170.

Distribution in Tunisia: Kebili, Tozeur (Puławski, 2007).

General distribution: Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates, Yemen), Africa south to Ghana and Kenya, Cyprus, Greece, Iran to Central Asia, southern Spain, Syria, Turkey, India (Gadallah, 2020).

***Tachysphex sericans gracilis* Puławski, 1971 (Fig. 2H)**

Tachysphex sericans gracilis Puławski, 1971. Państwowe Wydawnictwo Naukowe, Wrocław: 326.

Material examined. Kebili: South Kebili, Errahmat, 30 m, 17.5.2018, 2 ♂♂, 1 ♀.

Remark: This subspecies is new for Tunisian fauna.

General distribution: Algeria, Egypt (Puławski, 2020).

***Tachysphex speciosissimus* Morice, 1897**

Tachysphex speciosissimus Morice, 1897. The Transactions of the Entomological Society of London, 1897: 309.

Distribution in Tunisia: Gabes (Puławski, 2007).

General distribution: North Africa, Israel, Syria, Iran, Pakistan (Puławski, 2007).

Tachysphex tarsinus (Lepeletier de Saint-Fargeau, 1845)

Tachytes tarsinus Lepeletier de Saint-Fargeau, 1845. Histoire naturelle des Insectes. Hyménoptères. Tome Troisième: 243.

Distribution in Tunisia: Tozeur (Puławski, 2007).

General distribution: Algeria, Austria, Belarus, Bulgaria, China, Croatia, Czech Republic, Egypt, France, Germany, Greece, Hungary, Iran, Israel, Italy, Kazakhstan, Lebanon, Libya, Mauritania, Morocco, Poland, Portugal, Russia, Slovakia, Slovenia, Spain, Switzerland, Tajikistan, Tunisia, Turkey, Ukraine, Arabian Peninsula (Oman, Saudi Arabia, United Arab Emirates) (Gadallah, 2020).

Tachysphex unicolor (Panzer, 1809) (Fig. 2I)

LARRA unicolor Panzer, 1809. Faunae Insectorum Germaniae initia oder Deutschlands Insecten. Hundert und sechsten Hefts: 16.

Material examined. Mahdia: Sidi Alouane, Aouled Kloula, 64 m, 06.4.2018, 1 ♂.

General distribution: Afghanistan, China, Europe, Kazakhstan, North Africa, Lebanon, Mongolia, Palestine, Russia, Turkey, Turkmenistan (Puławski, 2020).

DISCUSSION

In this checklist 38 species and subspecies of the genus *Tachysphex* are presented in Tunisia. Because of its complexity and the problematic that it poses in systematical studies and to facilitate its study, the genus *Tachysphex* is divided into species groups (de Beaumont, 1936; Puławski, 1971, 2007). According to Puławski (2007), there are 18 *Tachysphex* species groups. Taxa present in this study belong to 11 species groups (Table 2). *T. panzeri* and *T. pompiliformis* species groups are the most diversified with 11 and 12 taxa respectively.

T. mauretanus Puławski, 1971 and *T. sericans gracilis* Puławski, 1971 are newly recorded from Tunisia. Geographically, these two taxa are distributed in Algeria and Morocco for the first species and in Algeria and Egypt for the second (Puławski, 2020). Therefore, Tunisia is added as a third distribution area for these two taxa.

According to de Beaumont (1940, 1947a) *T. palopterus* (Dahlbom, 1845) was recorded in Tunisia but without specific locality. With this study, the presence of this species is confirmed with six new provincial records (Kasserine, Kebili, Mahdia, Sidi Bouzid and Tozeur provinces). While, *T. mocsaryi* Kohl, 1884 was cited in Tunisia by de Beaumont (1947b) under the synonym *T. mocsaryi maroccanus* but without a specific locality; further study is so needed to confirm its presence in Tunisian territory.

The fauna of Tozeur province located in southern Tunisia is the most diversified with 17 records followed by Kebili with 11, Kairouan and Jendouba with 10 records (Fig.3). In other provinces, records vary between one and nine records with three provinces (Mannouba, Ariana, Ben Arous) are without records.

First Checklist of *Tachysphex* Kohl, 1883 of Tunisia

Number of species and subspecies presented in this checklist estimated by 38 species can be considered relatively low compared with that of other countries in North Africa such as the Egyptian fauna of *Tachysphex* estimated by 56 species (Roche, 2007). In addition to that, the absence or the reduced number of records in provinces suggests to conduct other entomological surveys to contribute better to the knowledge and evaluate this fauna in Tunisia. Discover of new country and provincial records and new species for the science is highly possible.

Table 2. Distribution of species and subspecies in species groups.

Species group	Species and subspecies
<i>Tachysphex albocinctus</i> group	<i>T. albocinctus</i>
<i>Tachysphex bicolor</i> group	<i>T. adjunctus</i> , <i>T. denisi</i> , <i>T. graecus</i>
<i>Tachysphex brevipennis</i> group	<i>T. brevipennis</i>
<i>Tachysphex brullii</i> group	<i>T. brullii</i>
<i>Tachysphex erythropus</i> group	<i>T. costae</i> , <i>T. detritus</i> , <i>T. erythropus</i> , <i>T. grandissimus</i>
<i>Tachysphex geniculatus</i> group	<i>T. horus</i>
<i>Tachysphex julliani</i> group	<i>T. julliani</i> , <i>T. mauretanus</i>
<i>Tachysphex panzeri</i> group	<i>T. atlanteus</i> , <i>T. brevipecten</i> , <i>T. gracilicornis</i> , <i>T. gracilitarsis</i> , <i>T. incertus</i> , <i>T. mocsaryi</i> , <i>T. mycerinus</i> , <i>T. notogoniaeformis</i> , <i>T. palopterus</i> , <i>T. panzeri</i> , <i>T. sericans gracilis</i>
<i>Tachysphex plicosus</i> group	<i>T. mediterraneus</i>
<i>Tachysphex pomphiliformis</i> group	<i>T. agnus</i> , <i>T. consocius</i> , <i>T. fugax</i> , <i>T. fulvitarsis</i> , <i>T. gujaraticus</i> , <i>T. nitidus</i> , <i>T. nitidior</i> , <i>T. psammobius</i> , <i>T. pseudofasciatus</i> , <i>T. speciosissimus</i> , <i>T. tarsinus</i> , <i>T. unicolor</i>
<i>Tachysphex schmiedeknechti</i> group	<i>T. schmiedeknechti</i>
Total	11 species groups
	38 species and subspecies

ACKNOWLEDGEMENTS

We would like to thank Dr. Jakub Straka (Charles University, Faculty of Science, Department of Zoology, Czech Republic) and Dr. Toshko Ljubomirov (Institute of Biodiversity and Ecosystem Research, Bulgarian Academy of Sciences) for confirmation of species identification or re-identification and to Dr. Claire Villemant, curator of Hymenoptera Collection in the Muséum Nationale d'Histoire Naturelle (MNHN), Paris for facilitating access to old documents hosted in MNHN. We are also grateful to directors of Agriculture Vocational Training centers (CFPA) of Sbeitla-Kasserine, Testour-Beja and Ghordhab- Tataouine and directors of: Regional Center for Research in Horticulture and Organic Agriculture of Chott Meriem (CRRHAB)- Sousse, Institute of Arid Regions (IRA) – Regional Direction of Kebili and Regional Center for Research in Oasian Agriculture (CRRAO) Deguache-Tozeur (Tunisia) for their significant collaboration and help in collection of specimens from different regions of Tunisia.
